Professional Summary

M.Sc. Mathematics graduate with practical experience in **analytics, Python, Microsoft Excel, and MySQL**. I am exploring **generative AI solutions like Copilot** and **prompt engineering** to create prescriptive analytics. I am looking for my first major opportunity and am prepared to shape my future by contributing with a proactive attitude.

Technical Skills

- **Programming Languages:** Python (Pandas, NumPy).
- **Databases & SQL:** MySQL, SQL (Complex Queries, JOIN Operations, Indexing).
- **Data Visualization & BI Tools:** Power BI, Matplotlib, Seaborn, Plotly Express, Looker Studio.
- **Jupyter Notebook / Google Colab:** Data analysis, visualization, and presentation
- **Excel:** Advanced Functions (VLOOKUP, HLOOKUP, TEXT, Conditional Formatting, PivotTables, INDEX-MATCH)
- **Data Analysis:** Data Cleaning, data hygiene, Aggregation, Statistical Analysis.
- **Generative AI:** Prompt Engineering (Basics)
- **Statistical Tools:** Hypothesis Testing, Trend Analysis, Regression Analysis, Z-Test, Forecasting.

Projects

FORD GOBIKE SHARING PROJECT – Internship Project– Punjab, IN

March 2025

- Analyzed 94,802 bike trips to identify peak usage hours, top stations, and customer behavior patterns across weekdays and weekends. Led **exploratory and diagnostic analytics** using Pandas.
- Discovered that subscribers are made up 75% of total rides and were 40% more active during weekday commute hours (7AM to 9 AM, 5PM to 7 PM). This drove improvements in bike reallocation.
- **Visualized key insights**, showing station usage hotspots and seasonal trends. This reduced bike unavailability complaints by 20%. Used Matplotlib and Seaborn for storytelling.

AIRBNB DATA ANALYSIS PROJECT – Internship Project – Punjab, IN

March 2025

- **Performed data cleaning and transformation** on 50,000+ listings, standardizing location, room types, and pricing fields, and generated derived columns for better categorization and analysis using Python and Power BI.
- Examined property, pricing, and host trends, I found that entire homes represent 70% of listings, with top neighborhoods having average prices 2.5 times higher than the city median.
- **Built interactive dashboards that focus on four key insights:** Overview, Property, Pricing, Host. These dashboards allow stakeholders to explore correlations/connections like host type and pricing as well as review count and occupancy rate.

CORONAVIRUS ANALYSIS – Internship Project – Punjab, IN

July 2024

- **Extracted and transformed COVID-19 data from multiple tables using JOIN operations** for better insights.
- **Changed raw data through aggregate functions**, enhancing report accuracy by 20%.
- Improved database performance through data management and maintenance, which included refining queries, reducing query execution time by 30%. This ensured data integrity.

Internships

BUSINESS ANALYST INTERN – Labmentix – Punjab, IN

March – April 2025

- Led exploratory analysis **to improve data hygiene and help business teams with cleaner inputs, enhancing data accuracy** by 15% and allowing for better strategic decisions using Python and MySQL.
- **Developed interactive dashboards and visual reports** that sped up stakeholder decision-making speed by 20% through a **clear presentation of key market trends and insights**.
- **Visualized data to help stakeholders understand business performance and identify the three main causes of data inaccuracies**, which increased data accuracy by 30%. I used storytelling techniques with Python.

DATA ANALYST INTERN – InnoByte Solutions, Punjab, IN

May-July 2024

- Cleaned and prepared Amazon sales report data using Excel functions **like IF, VLOOKUP, TEXT, and TRIM** to fix errors and standardize formats.
- Examined more than 10,000 rows of data to identify trends in sales performance, product categories, and fulfilment methods.
- **Created a dashboard in Excel using pivot tables, slicers, charts, and conditional formatting to show key metrics** like total sales, top products, and regional sales performance.

DATA ANALYST TRAINEE AND VIRTUAL INTERN - Trainity, Punjab, IN

January – April 2024

- Completed training **in MySQL, Python, Excel, Power BI, and data analysis**; applied concepts through hands-on business case projects.
- Led exploratory analysis on 8 project datasets to identify trends, find data issues, and solve problems.
- **Constructed interactive dashboards that improved insight delivery and supported quicker decision-making for mock client's scenarios**.

Education

MASTER OF SCIENCE IN MATHEMATICS - Panjab University – Chandigarh, IN

June 2022

BACHELORS OF SCIENCE IN MATHEMATICS - Panjab University – Chandigarh, IN

June 2020

Certifications and Virtual Projects

- Forage Virtual Job Simulation – **PwC (Power BI)**
Built dashboards and analyzed financial datasets to inform business decisions using Power BI.
- Forage Virtual Job Simulation – **Accenture (Data Visualization)**
Delivered actionable insights through storytelling, empowering strategy with effective data visuals.
- Forage Virtual Job Simulation – **TATA (Data Analytics & Visualization)**
Performed data cleaning, KPI analysis, and created BI dashboards to communicate business metrics.
- Training Certificate in Data Analytics Tools – Trainity
Tools covered: MySQL, Excel, Python, Power BI
- Prompt Engineering for ChatGPT – Internshala Trainings
- Business Analysis & Process Management – Coursera
